

Computer Science 2-Advanced Web Design- GITA 2  
2011/2012

Dear Parents,

I am looking forward to working with your child in my class this year. I hope it will be a positive experience for everyone. Advanced Web Design is a UC approved college level honors course. I understand that your child is not in college. However, he/she will be expected to perform at that level.

My classroom procedures and grading policies are posted at [www.globalitacademy.us/Salesky](http://www.globalitacademy.us/Salesky). Please take a few minutes to read and discuss them with your child. Please return the bottom portion of this letter signed for extra credit points. My website will always have these procedures, so you may review them at any time.

Students need a flash drive to store their programs. Every assignment must be saved for reference. Students should periodically backup their programs so important data is not lost. Students may be required to alter previous programs significantly later in the year.

I am very excited about teaching Advanced Web Design this year! I believe your child will love the course content and learn many valuable skills. This course is a great new edition to the GITA program and to the high school. However, this course has advanced programming as part of its curriculum. If you find that your child is falling behind or needs further instruction, please let me know. I want to assist you and your child in my fullest capacity. I am more than willing to give extra help during class time, lunch or by appointment. If you do not contact me, I will assume that your child's grade is adequate for your standards.

By working together, we can help your child have a great year! If you have questions, comments, or concerns, please call me at 990 – 7850 ext. 2221. You may also contact me at [tsalesky@bousd.us](mailto:tsalesky@bousd.us). Email is the best way for me to interact with you. I check my email at the end of every school day.

Sincerely,

Todd Salesky

---

I have read and understand the class expectations.
